## PROFESSIONAL SUMMARY

With 5 years of experience, I am a seasoned developer with a demonstrated history of working on large scale enterprise level applications. I have gained hands-on experience in all stages of application development along with the ability to understand customer needs, communicate effectively and adapt well to changes in workplace environments. Turning ideas into real world solutions is my key strength, which compliments my love for learning new technologies.

## WORK EXPERIENCE

**Senior Software Developer, Khayal Consultants** - June, 2019 - present, Kuwait

- Worked with [SDL Tridion Sites](#) to develop web applications for [Central Bank of Kuwait \(CBK\)](#), [Gulf Bank](#) and [Kuwait Airport](#).
- Developed custom applications to help marketing and publishing teams publish complex content and generate auto-mailing.
- Worked with [Kentico](#) to develop web applications for clients.

**Senior Software Engineer, OneGlobal** - July, 2018 - June, 2019 - Kuwait City, Kuwait

- Designed and developed Og Masterpass Wallet, a web based wallet using Masterpass Partner-Hosted Wallet APIs, enabling consumers of Og Money and third-party merchants to checkout from any internet enabled device.
- Developed Og Pay - cloud-based solution that enables businesses to quickly become capable of making and accepting secure digital payments in various settings; both in-store and remotely.

**Software Engineer, OneGlobal** - June, 2015 - June, 2018 - Kuwait City, Kuwait

- Worked as a key part of the IT team at OneGlobal, working on [Og Money](#) - the largest e-payment application in Kuwait.

- Developed the backend functionality of [KFH Wallet](#) using MasterCard Digital Enablement Service (MDES), allowing its users to turn regular payment cards into digital tokens and perform contactless payments.
- Responsible for the development of PCI Certified solution in Kuwait and Bahrain to securely store customer card information on file.
- Developed core code for different services, bug fixes, troubleshooting and performing software maintenance.
- Integrated with several payment service providers such as MasterCards' MPGS, Knet, SEPAExpress, Mobile Money in Uganda among others.
- Responsible for documenting the development process and providing merchant documentation.
- Acted as client liaison, discovering customer requirements and handling customer escalations.
- Provided technical support to OneGlobal Customer Support teams in Kuwait, Egypt and Uganda.
- Experience using modern version control systems such as Azure DevOps, Team Foundation Server and Git.
